

Jennie Lekich serves as the director of clinical informatics for The Physician Alliance, one of Michigan's largest physician organizations. In this leadership position, she manages Philip's Wellcentive Outcomes Manager population health platform encompassing over 30 live interface feeds, four payer outbound feeds, the Michigan Health Information Network admit, discharge and transfer feed and oversees data validation, data analysis and reporting for internal and external customers using Philip's Wellcentive tool.

Prior to joining TPA, Jennie worked as a solutions development analyst for Ascension Health implementing electronic medical record solutions for both employed and private provider groups and later as a clinical transformation consultant for St. John Providence Health System's clinical transformation team where she provided adoption assessment observations and created best practice optimization workflows for provider groups. She led super user community group meetings on a monthly basis and was instrumental in the development and execution of the electronic medical record education/training plan for new implementations. She has worked with a variety of electronic health record software tools including practice management modules, health information exchange hubs and patient portals.

Jennie holds a bachelors' degree in business administration and business marketing from the University of Phoenix and a master's degree in administration from Central Michigan University. She is an active member of the American Health Information Management Association and the Health Information and Management Systems Society.
